

Ecobat energy Tanzania

Who is ecobat resources?

Ecobat Resources is the leader in the responsible recycling and production of resources essential to modern life, including lead, polypropylene, and other commodities. Ecobat Logistics manages the collection of end-of-life batteries as part of our commitment to supporting the closed-loop management and recycling of energy storage solutions.

Who is ecobat?

Connect with one of our representatives. With operations throughout Europe and the United States, Ecobat is a leader in the collection, recycling, production and distribution of energy storage solutions, lead and polypropylene products, and other commodities essential to modern life.

What makes ecobat a sustainable company?

At Ecobat, our operations are centered around sustainable processes and practices for the safe, effective handling of each of our resources to increase supply of raw materials back into battery production, no matter the chemistry. Transforming resources to power a more connected, sustainable world.

What is ecobat & how does it work?

Powering tomorrow, starting today. Ecobat is a world leader in the production of lead, lead alloys, and the recycling of lead batteries. Our vast network features 11 smelters across two continents with an average annual output of 840,000 tons of lead.

What has ecobat done for the battery industry?

Ecobat continues to make headlines for breakthroughs in lead production and recycling. Discover what we've accomplished lately and our impact on the industry. For 30 years, our worldwide engagement with researchers has led to more efficient battery performance.

What is ecobat solutions doing in 2022?

In 2022, Ecobat Solutions offered pan-European collection, including critical batteries, and recycled in both the UK and Germany. Process upgrades will take place at both facilities in 2023 to increase the volume of batteries recycled and the recovery of metals recycled. In addition, construction of the first North American facility began in 2022.
