

Ecosmart energy systems Norfolk Island

What is EcoSmart and how does it work?

EcoSmart is a system that uses its proprietary EcoNOC digital energy management and optimization platform to measure both solar production and energy usage characteristics in every home. It optimizes energy use according to each homeowner's schedule while safeguarding the home itself, using smart home technology.

Is EcoSmart an energy efficient solution?

EcoSmart is an energy efficient solution, as homes with EcoSmart typically have a HERS score lower than 25, making them among the most energy-efficient in the market. Homeowners using EcoSmart are currently eligible for tax incentives available for both solar and geothermal systems.

What makes EcoSmart homes energy-efficient?

Installed during the earliest phases of development, the GeoGrid(TM) is a community-wide utility, similar to water, sewer, and electric lines. What makes EcoSmart homes energy-efficient is the geothermal technology. EcoSmart uses geothermal technology combined with other renewable energy resources, like solar panels.

What can EcoSmart do for You?

More information EcoSmart are able to offer our home customers a range of renewable energy options, to enable your property to become more efficient and environmentally conscious. Making the right choice can be confusing. We will work with you to produce a scheme that best meets your needs, and that is also suitable for the property.

Does EcoSmart use geothermal heat pumps?

EcoSmart uses geothermal heat pumps built by leading manufacturers in America. EcoSmart Solution approved vendors engineer, install, and service the Solar PV systems that work with EcoSmart's geothermal systems to create zero energy capable homes.

Why should you choose EcoSmart solution partner homes?

eco-friendly solution. EcoSmart Solution partner homes are zero energy capable. You're ready for a home that lives, works, and lasts better. A superior, sustainable solution is available today.
