

Does Schneider Electric offer EcoStruxure?

As part of the EcoStruxure ecosystem, Schneider Electric offers EcoStruxure Grid and EcoStruxure Building modules that deliver targeted control, monitoring and automation capabilities for smart facilities and microgrids. Schneider Electric is constantly upgrading its offering through research and development, acquisitions and partnerships.

What is EcoStruxure grid?

With its digital architectures and services, EcoStruxure Grid bridges the gap between the supply and demand sides, providing an End-To-End software cycle (from design, build, operate to maintain) to help Electricity utilities achieve a more sustainable future.

Does Schneider Electric offer microgrid products?

Schneider Electric offers microgrid products designed for a range of facilities. Its product suite caters for large energy consumers, such as hospitals, data centres and manufacturers, as well as smaller consumers such as offices, retail and hotels.

Are microgrids a viable alternative to boosting direct grid capacity?

Microgrids are emerging as a viable alternative to boosting direct grid capacity by using on-site generation and storage to virtually increase capacity without modifying existing energy supplies.

EcoStruxure(TM) Grid Operation is a grid operations solution that provides a unique set of integrated tools for managing grids of the future. Tailored for small & small-to-medium utilities that seek ways to maximize operational efficiency and improve reliability & resilience while reducing investments.

Browse our products and documents for EcoStruxure(TM) Power Automation System - Digital control system for a more efficient and connected power grid ... (English) Equatorial Guinea Francophone Africa Gabon Gambia Ghana Guinea Iraq Israel Ivory Coast Jordan Kenya Kuwait Lebanon Liberia Libya Madagascar Malawi Mali Mauritania Mauritius Mayotte ...

EcoStruxure Microgrid Flex solution takes advantage of a combination of edge and cloud devices/services to execute control logic at different time scales, thereby encompassing the requirements of both Energy and Power Management Systems (EMS and PMS). ... Performs real time controls (in the scale of seconds) when grid tied for grid code ...

Schneider Electric's EcoStruxure DERMS is designed for energy companies with high penetration of distributed generation, or the ones with strong vision of achieving greater grid flexibility. DERMS provides visibility, monitoring, control ...
