

# Ecuador solar generator portable

Can a solar generator be used outside?

No maintenance. Outdoors is the only safe place to operate a portable gas generator, keeping your family safe from toxic carbon monoxide. Since it doesn't emit any fumes you can use a solar generator anywhere, inside or out. The media could not be loaded, either because the server or network failed or because the format is not supported.

How quiet is a solar generator?

No maintenance. Without internal combustion engines, solar generators are extremely quiet. From a distance of approximately 20 inches, the noise level of a DELTA 2 Max solar generator (low input and output of around 500W) is only 30 dB, versus others with a volume of 45 dB or higher.

Are solar generators a good alternative to gas generators?

No maintenance. Solar generators don't burn fossil fuel, so with zero emissions or fumes, they're a clean replacement for gas generators. The media could not be loaded, either because the server or network failed or because the format is not supported. No fumes. No noise. No maintenance.

The power outages are an energy rationing policy that, although paused during the rest of December, will resume in Jan 2024. If the drought doesn't get any better (and seems like it won't) the power outages next month will be around 4 hours every day. No portable generator will help you with that so plan accordingly.
