How does EDP work in El Salvador?

By shifting a significant amount of power supply to natural gas,EDP reduces El Salvador's reliance on diesel and heavy fuel oil-fired power generation,offsetting 600,000 tons of carbon dioxide emissions per year,and provides grid support to facilitate more renewable energy penetration,further diversifying the country's energy mix.

When did El Salvador's EDP power plant start operating?

Despite the enormous challenges,including supply-chain disruptions,travel restrictions,airport closures,global financial volatility,and Salvadoran COVID-19 mitigation measures and regulations,the power plant began commercial operation in October 2022. EDP is a transformative investment in El Salvador's clean energy future.

Where can I find information about Energia del Pacifico?

To learn more, please visit the Energia del Pacifico website. View our Cookie Policy. This facility brings critical energy infrastructure to El Salvador to meet the country's energy demand.

Will EDP introduce a new source of thermal energy to El Salvador?

EDP will introduce a new source of thermal generation to El Salvador through power purchase agreements with seven of the country's distribution companies.

Who developed the EDP project in El Salvador?

Invenergy served as lead developer of the EDP project with the support of El Salvador-based partners Grupo Calleja, VC Energy de Centroamerica and Quantum Energy. To construct the project,Invenergy worked with a consortium of global project partners including BW LNG,BW Offshore,SAAM Towage,Boskalis,Wärtsilä,Elecnor,and Shell.

How does electricity work in El Salvador?

From there, the gas powers 19 internal combustion engines and waste heat feeds one steam turbine. Two 230-kV electric transmission lines, one of which connects to the Central American Electrical Interconnection System, provides added grid reliability to the region and opens further opportunities for renewable energy in El Salvador.

By 2050, electricity consumption in El Salvador is expected to grow, with nuclear energy potentially accounting for 26% of the country's energy matrix. Congressman William Soriano remarked, "El Salvador has the right to explore these opportunities and diversify its energy sources for future generations."

El gobierno entregó instrumentos legales a la Agencia Internacional de Energía Atómica (IAEA) que permitan al país tener voto en el organismo y recibir apoyo para proyectos de este tipo.

Representantes del gobierno de El Salvador participaron en la 68ª Conferencia General de la Organización Internacional de Energía Atómica (IAEA por sus siglas en inglés), para presentar sus planes de incorporar la energía nuclear a la matriz energética de su país. El director general de Energía, Hidrocarburos y Minas, Daniel Álvarez, se sumó a los delegados ...
