

What are El Salvador's green energy ambitions?

El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024. - El Salvador in English El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024.

Does El Salvador have a target for renewables in end-use sectors?

El Salvador does not currently have targets for renewables in end-use sectors, either. Establishing targets for renewable energy in transport, heating and cooling, agriculture and industry could contribute to a further scale-up of renewables in the country, and help achieve emissions reduction targets while creating new business opportunities.

Who is responsible for implementing El Salvador's energy policy?

The primary entity for implementing this energy policy is the CEL and its subsidiary companies. These assume a strategic role in energy research, project execution and renewable energy generation, as well as maintaining a high degree of co-ordination with the CNE in the development of El Salvador's energy sector.

Is El Salvador a green country?

El Salvador stands at the forefront of this green revolution, with 80% of its energy matrix already being generated from renewable sources. Daniel Álvarez, President of the Executive Hydroelectric Commission of the Lempa River (CEL), highlighted the nation's commitment to furthering its green agenda in 2024.

Will El Salvador get a new PPA for renewables?

This project already holds a PPA, which was awarded during the first energy bidding process in El Salvador back in 2012. It will also cover a large part of the distribution companies' demand. Following the plant coming online, the allocation of new PPAs for renewables will likely depend on the growth of electricity demand and future energy policy.

What is El Salvador's new energy policy 2020-2050?

The new National Energy Policy 2020-2050 aims to diversify El Salvador's energy mix and take advantage of the country's significant renewable energy resource potential. At the same time, the policy highlights the need to reduce dependence on fossil fuels and mitigate the impact of climate change.
