

# Energise energy solutions Antarctica

What services does energise offer?

Energise offers a comprehensive list of energy services to help ensure efficient energy consumption. We work closely with you on a range of tailored energy services and efficiency solutions to ensure your operations are sustainable, compliant, and efficient.

How can energise help you?

Our specialist consultants are perfectly equipped to help you navigate your organisation's reporting and compliance obligations, but we don't just want to help our customers tick boxes. Energise offers a comprehensive list of energy services to help ensure efficient energy consumption.

What is a hybrid energy system in Antarctica?

Many national Antarctic programmes (NAPs) have adopted hybrid systems combining fossil fuels and renewable energy sources, with a preference for solar or wind depending on the specific location of the research station and previous experiences with certain technologies.

Can co-generation be used in Antarctica?

A study conducted for the Brazilian Comandante Ferraz Antarctic Station explored the potential of co-generation and a combination of different renewable energy sources, observing the greatest potential for wind energy, followed by solar PV panels (covering only 3.3% of total annual consumption if placed on walls; de Christo et al. 2016).

Why should you choose energise energy solutions?

Get a quote today! Why Choose Energise Energy Solutions? With over 5 years experience installing Commercial and Domestic EV Chargers, you can trust that we will complete your install to the highest standard and offer exemplary customer service along the way. Installation was quick, easy, friendly and the process was very simple.

Can solar energy be used in Antarctica?

Solar energy has also become prevalent in Antarctic operations in the last decade. This type of energy was mainly introduced either to complement wind energy or in summer bases, summer shelters and on expedition equipment that can be powered by solar energy (radios, very-high-frequency (VHF) repeaters).

Since 2018, Energise Energy Solutions have been working independently and in partnership with large energy and EV providers, helping customers reorientate their businesses and homes away from using fossil fuels, to help tackle the climate crisis. We have been awarded EV Charge Point Contact ...

I have just had a Pod Point electric car charger installed on my property by Energise Energy Solutions. It was a difficult, challenging and awkward long internal cable run, the installer, Dominic did an excellent job, nothing was too much trouble and thanks to his excellent care and attention, the disruption was kept to a minimum and the installation is all very neat and tidy.
