What is the energy strategy for Guernsey?

The Committee for the Environment & Infrastructure is developing an Electricity Strategy for Guernsey. The strategy will consider expected future energy demand levels and set out how this demand could be met, whilst also reviewing how the market structure will need to change to support this.

What is the energy transition in Guernsey?

In Guernsey, we currently rely on fossil-fuel based systems of energy production and consumption and operate a thermal power station. However, it is recognised that as part of the response to climate change, there is a need to transition to an energy mix with limited, if not zero carbon emissions. This is often referred to as the energy transition.

The Energy Policy 2020-2050 established that the vast majority of Guernsey's energy supplies will come from clean, low carbon sources by 2050 at the latest, local renewable generation will be encouraged and residual emissions will be offset. In order to deliver this, the six following objectives were agreed: ...
