

Energy efficient batteries Isle of Man

How can the Isle of Man Government help you?

Save money, reduce emissions and become more energy efficient! If you are looking to reduce your household bills and/or create a more energy efficient home the Isle of Man Government offer advice, support and incentives that could help. Our homes are the largest carbon emissions contributor in the Isle of Man.

Can electricity be decarbonised on the Isle of Man?

Electricity generation is responsible for approximately 33% of all greenhouse gas emissions on the Isle of Man, and a majority of this is currently sourced from fossil fuels (natural gas). Without the decarbonisation of electricity, it will not be possible to reduce carbon emissions significantly in other areas such as heating and transport.

Will intermittent renewables be profitable for the Isle of Man?

It is unlikely that the export of intermittent renewables will be profitable for the Isle of Man given the reasons outlined in this document. The Isle of Man currently imports all of its energy from the UK (with the exception of what is produced from Sulby).

Can Isle of Man export electricity to GB?

There are also limited opportunities for Isle of Man to export electricity to GB, due to the excess capacity of renewable generators expected to be in operation by 2050. Isle of Man assets also have an 11% CAPEX uplift compared to equivalent UK installations, due to labour, available skill-set, transport and economies of scale.

Does the Isle of Man import energy from the UK?

The Isle of Man currently imports all of its energy from the UK (with the exception of what is produced from Sulby). In all future models, the Isle of Man remains dependent on GB for the provision of baseload. This is the case even where capacity is increased by building excess renewables, as the stabilisation is still provided by interconnectors.

Where does the Isle of Man electricity come from?

The majority of the Isle of Man's electricity is currently sourced from fossil fuels. The interconnector is a source of carbon neutral electricity on island and also provides a route to export electricity to the GB Market.

We offer total energy solutions for commercial and industrial companies in Isle Of Man. We help clients take control of their energy! ... by maximizing the use of energy reduction technologies and power of Big Data, AI and IoT. In short, we help our clients achieve the optimum process to make their building portfolios energy efficient. Why ...
