

What is Namibia's energy sector goal?

The Government's energy sector goal, according to Namibia's 5th National Development Plan, is to have a sustainable mix of locally generated capacity of 755 MW by 2022 to support households and industry needs, reduce reliance on imports, and increase the national electricity access rate from 49% in 2018 to 67.5% by 2023.

Where does Namibia's electricity come from?

The imported electricity is provided by the Southern African Power Pool (SAPP) primarily from South Africa. Looking at the energy sector more broadly, the total primary energy supply (TPES) in Namibia in 2017 was 20,350 GWh. 15,350 GWh of this TPES came from crude oil, which was all imported into the country.

Are there energy resources in Namibia?

Geological data suggests that there are considerable oil and gas reserves in the Walvis, Luderitz and Orange River offshore basins. Namibia has considerable solar, biomass, hydropower and wind energy resources; while the total installed renewable energy capacity was 431 MW in 2018, the total opportunity is many times greater.

What is the solar potential in Namibia?

The solar potential in Namibia, according to their National Integrated Resource Plan, has "no limit" in their estimations, while the biomass, wind and hydro potential was estimated at 600 MW, 300 MW and 300 MW, respectively.

How much wind power does Namibia have?

The NIRP, however, estimates the national biomass potential as 600 MW. Namibia has suitable wind resource for large-scale wind power projects according to the most recent NIRP. It was estimated that the country's wind resource potential was around 300 MW, and is most concentrated along the western coastline, particularly in the south-west.

Which sector contributes the most to Namibia's GDP?

The tertiary sector and primary sectors are the largest contributors to the country's GDP, at 62% and 21%, respectively as of 2017. The primary sector is dominated by mining activities and the major minerals mined in Namibia include diamonds, copper, gold, and uranium.
