

Energy system Trinidad and Tobago

How is electricity produced in Trinidad and Tobago?

Source: IEA,2012b. 19 Since April 2013,all public electricity is produced exclusively from gas,when the Cover power station on Tobago started to operate on gas instead of oil. A Unique Approach for Sustainable Energy in Trinidad and Tobago 24 Carbon Intensity of Power Generation

Does Trinidad and Tobago have a power generation capacity?

However,Trinidad and Tobago power generation capacity surpasses its current demand(Inter- American Development Bank,2015),which provides avenues for energy storage through low carbon H₂,MeOH and NH₃ production directly within the local downstream supply chain.

Who owns the energy in Trinidad & Tobago?

In 1994,it divested from its generation holdings on the larger island of Trinidad and now purchases energy from three Independent Power Producers (IPPs): the Power Generation Company of Trinidad and Tobago,which purchased the former T&TEC-operated plants and presently controls 1,386 megawatts (MW) of gas-fired capacity across

Who regulates the energy sector in Trinidad & Tobago?

The MEEI(Ministry of Energy and Energy Industries) manages Trinidad and Tobago's oil,gas,and mineral resources. The MEEI is responsible for monitoring,controlling,and regulating the country's energy and mineral sectors. The Regulated Industries Commission also serves as a regulator for the energy sector.

Is biomass a source of electricity in Trinidad & Tobago?

Traditional biomass - the burning of charcoal,crop waste,and other organic matter - is not included. This can be an important source in lower-income settings. Trinidad and Tobago: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does Trinidad & Tobago need energy subsidies?

Unlike many island nations,Trinidad and Tobago has significant oil and natural gas reserves and is a net exporter of these fuels. However,subsidies for domestic energy consumption have created a fiscal burden on the governmentthat could be reduced through the expansion of alternative transportation fuels,energy efficiency,and renewable energy.
