

Who is online energy solutions?

Online Energy Solutions | 5,219 followers on LinkedIn. Increase efficiency and reliability of energy systems and integrate renewable sources with artificial intelligence. | We offer things like Dynamic Line Rating and Digital Twin technologies to help utilities get more out of their existing infrastructure.

What makes online solutions unique?

Our innovative solutions enhance efficiency, reliability, and sustainability at every stage of the energy lifecycle. Online Solutions leverage a modular architecture, where each solution--Design (D), Power Generation (PG), Grids Operation (GO), and Industry (I)--is composed of independent, specialized modules.

What regulatory regimes apply to oil & gas production in Azerbaijan?

Two basic regulatory regimes apply to oil and gas exploration and production in Azerbaijan: the system established under the Law on Energy and implemented through energy contracts, and regimes particular to each case established by specific production sharing agreements (PSAs).

Which energy sources are used in the transport sector in Azerbaijan?

Most oil products used in the transport sector are produced in Azerbaijan. TFC consists mainly of natural gas (43%) and oil products (39%), followed by electricity (15%). Renewable energy sources, including hydro, contributed 1.5% to total energy supply in 2022 and 6% (1.8 TWh) to electricity supply.

What is Azerbaijan's energy policy?

The 2004 State Programme on the Development of the Fuel-Energy Complex for 2005 to 2015, designed to support oil and gas developments and to ensure energy supply security, set out Azerbaijan's main energy policy.

How much energy does Azerbaijan need?

Azerbaijan's energy demand (measured as total energy supply [TES]) was 16.1 million tonnes of oil equivalent (Mtoe) in 2022 (according to preliminary data from the State Statistical Committee). Azerbaijan is a major producer of crude oil (32.7 Mt including natural gas liquids in 2022) and of natural gas (35.0 bcm in 2022).

Senior Executive · Senior Executive - Experience in middle and top management, both in the food and engineering industries. Through my career, I have worked closely and in partnership with local and international stakeholders, and in companies in different stages of development, from start-up phase to mature business, both national and internationally. I am a multilingual MSc ...

Dynamic Line Rating (DLR) is a key grid enhancing technology, crucial for the energy transition, designed to ensure optimal infrastructure usage by using real-time data to determine the capacity of the line. This technology helps prevent overloads, optimizes transmission usage, and supports the integration of renewable
