

What are the benefits of solar energy in Eritrea?

The government of Eritrea has been making efforts to promote the use of alternative sources of energy, especially solar energy, to mitigate the problems associated with the use of fossil fuel. A major benefit of solar energy is that it does not pollute the environment and saves money in the long run even if its installation cost is quite high.

Does Eritrea have solar power?

Eritrea's weather, characterized by long sunny days throughout the year, makes it suitable for harnessing solar power. Data from the wind and solar monitoring stations installed in many parts of Eritrea show that the country has a great potential, around 6 kWh/m² of solar energy.

Does Al-Nasr offer off-grid solar?

At Al-Nasr Solar for Energy Solutions, we offer off-grid solar systems designed to provide complete energy independence for locations that are not connected to the main power grid.

Does Eritrea have a solar farm?

Eritrea is lagging far behind in the electrification of its territory and is now turning to renewable energy. The government has launched the country's first solar farm, a 30-MW facility 30 km from the capital, Asmara.

What is Eritrea's main source of energy?

Eritrea's major source of energy is petroleum, which drains the foreign currency reserves of the country and is globally a major cause of pollution. The government of Eritrea has been making efforts to promote the use of alternative sources of energy, especially solar energy, to mitigate the problems associated with the use of fossil fuel.

How is electricity generated in Eritrea?

Eritrea's NDCs were developed in 2018. The majority of electricity generated in the country is from imported fossil fuels. In 2019, the electrification rate in rural areas of Eritrea was only 37%, compared to 76% in urban areas. Some projects financed by international donors are aimed at increasing these rates.

Al-Nasr Solar is proud to be the first Yemeni company to supply and deliver a fully integrated energy storage system from Jinko Solar with a storage capacity of 270 kWh, a 100 kW three-phase inverter, and a 6000-cycle lifespan at 90% depth of discharge. This system was installed at the Yemeni Immigration and Passports Building, funded by the ...

We are a Middle East engineering company founded in June 1996 specialized in design, supply, install and maintenance solar energy systems such as solar pump system, solar power system for commercial and industrial enterprises, home and street lighting that we offer clean, economic and appropriate energy solutions.
