

Where is Eritrea's first solar plant?

The government of Eritrea has received a \$49.92 million grant from the African Development Bank to fund a 30 MW photovoltaic plant in the town of Dekemhare, 40 km southeast of the capital Asmara. It will be the country's first large-scale solar plant.

Does Eritrea have solar power?

Eritrea's weather, characterized by long sunny days throughout the year, makes it suitable for harnessing solar power. Data from the wind and solar monitoring stations installed in many parts of Eritrea show that the country has a great potential, around 6 kwh/m<sup>2</sup> of solar energy.

What are the benefits of solar energy in Eritrea?

The government of Eritrea has been making efforts to promote the use of alternative sources of energy, especially solar energy, to mitigate the problems associated with the use of fossil fuel. A major benefit of solar energy is that it does not pollute the environment and saves money in the long run even if its installation cost is quite high.

How much PV capacity does Eritrea have in 2021?

According to the International Renewable Energy Agency (IRENA), Eritrea had just 24 MW of installed PV capacity at the end of 2021. This content is protected by copyright and may not be reused. What is the African Development Fund (ADF) doing in Eritrea?

The African Development Fund (ADF) is helping Eritrea's government to develop a 30 MW solar plant in Dekemhare, in the central part of the African country. The ADF is currently seeking consultants for the project through a tender. The project will include an unspecified amount of battery storage and a 66 kV transmission line.

What is Eritrea's national energy policy?

Prospective consultants have until Feb. 23 to submit their proposals. The Eritrea National Energy Policy, which was issued in 2018, aims to increase the electrification rate across the country. According to the International Renewable Energy Agency (IRENA), Eritrea had just 24 MW of installed PV capacity at the end of 2021.

The study "Estimating Solar Energy Potential in Eritrea: A GIS-based Approach" employs Geographic Information Systems (GIS) estimated Eritrea's solar energy potential at a regional level, providing insights for future large-scale solar ...
