

Enerflex Ltd, an international company headquartered in Calgary, supplies solutions for natural gas compression, oil and gas processing, refrigeration systems and power generation equipment. Each substructure integrates a series of pressure vessels, which in-turn requires skilled and hard-to-find pressure vessel welders.

Enerflex has been actively involved in the e-compression space for decades, and to-date we have installed over 3 million horsepower of electric-motor compression worldwide. Our team of dedicated specialists work with our client partners on delivering a range of solutions: Electrification of gas compression solutions; Solar self-generation

Pipeline specification determines the dew point required. Enerflex provides a selection of dew point control methods -- each used to their specific capabilities to ... which is a simple and economical alternative to standard refrigeration. Enerflex provides solutions that: Control BTU value when high pressure gas is available; Provide a -6.5 ...

Enerflex's MBF, introduces trillions of microscopic bubbles as small as 5 microns in size to untreated water. Utilizing MBF; oil separation is maximized even in the most challenging of waters. Unlike Dissolved Air Flotation (DAF) systems that rely on solubility or typical Induced Gas Flotation (IGF) technologies that use large bubbles, MBF ...

Complete turnkey solutions, including field construction; 24/7 support, no matter how remote the location; Enerflex is the Jenbacher Distributor and Service Provider for Canada and also provides Jenbacher products and lifecycle solutions across most USA states. The Company is also a global Platinum Power Packager for Waukesha engines and parts.

Enerflex's Solution. Our solutions cover the entire system (gas-to-wire). Whether you run a farm, a food processing plant, a brewery, or a pulp mill, you should investigate how biogas cogeneration can support your business. Biogas Value Chain and Enerflex. Essentially converting released CH ...

Enerflex's infrastructure financing solutions offer the best value for both our clients and partners. While you focus on your fundamental operations, we take responsibility for the design, build, commissioning, operations, and ...

Eritrea enerflex solutions

Enerflex managed the turnkey engineering, design, manufacturing, onsite construction, start-up, and commissioning of six mechanical refrigeration units (MRUs) dew point control gas plants in less than 18 months. Enerflex was selected based on its extensive experience in mechanical refrigeration and a service facility located close to the gas ...

Enerflex is a premier integrated global provider of energy infrastructure and energy transition solutions, deploying natural gas, low-carbon, and treated water solutions - from individual ...

Enerflex's innovative hydrogen solutions consist of compression systems and H2 electrolyzer packages for blue and green hydrogen projects. Enerflex logo . open mobile menu . Equipment . Equipment . We deploy and service high-quality sustainable energy infrastructure. ...

Enerflex is committed to delivering sustainable value through financial discipline and strategic growth. As global demand for natural gas grows over the next decade, our leadership in energy infrastructure will allow us to capitalize on these market opportunities, strengthening our financial position as the global market evolves.

Better water treatment for a better tomorrow Enerflex is an industry leader in technologies, solutions, and services for quickly and cost-efficiently treating produced water ranging in volumes from 1,000 to >1,000,000 + BWPD. From end-to-end, we are proud to partner with our customers to deliver experience, expertise, and an unrelenting commitment to service. With resources [...]

Enerflex supplied a three-year rental with operations and maintenance for a local customer. The Enerflex equipment consisted of 300 HP of high-specification, custom-designed packages. This was the first offshore performance-based gas compression rental project Enerflex, completed in ...

Enerflex has developed a core expertise in the conversion of raw biogas into valuable renewable electricity and heat. Our solutions cover the entire turnkey system (gas-to-wire) including gas blower systems, gas dehumidification, H₂S removal, siloxane removal, combined heat and power, grid interconnection, and thermal integration. Whether you ...
