

Estonia electricity container

Who sells electricity in Estonia?

In Estonia's electricity market, Eesti Energia is the largest seller with a 60% market share and owns the largest distribution network, representing 86% of the distribution market. The Estonian Competition Authority (ECA) regulates transmission and distribution rates, as well as connection charges. Electricity in 2020:

How much money has Estonia provided for energy storage projects?

A state agency in Estonia has provided EUR 5.2 million (US\$ 5.7 million) in grants for 10 energy storage projects, including a 4MW/8MWh battery storage project from utility Eesti Energia. The state-funded Environmental Investment Centre announced the grant funding for the ten projects being developed by six companies today (28 June).

Why is Estonia a hub of electricity?

Estonia's grid is an important hub as it is connected to Finland in the north, Russia in the east, Latvia and Lithuania in the south. Electricity is traded on the Nordic power market Nord Pool. In 2014-2016, yearly net imports from Finland were equal to 31-67% of consumption.

Is Estonia connected to the Western European electricity system?

Since the middle of the last decade, Estonia has become increasingly linked to the Western European electricity system. In 2006, the EstLink 1 direct current interconnection between Estonia and Finland was completed, making it the first interconnection for Estonia and the Baltic states with Scandinavia.

Can Eesti Energia build a large-scale energy storage facility?

Eesti Energia was unable to secure a contract for a large-scale energy storage facility through an international tender. It is expected that it would have a capacity ranging from 25 to 50 megawatt-hours that sufficiently meets the reserve needs of the Baltic countries.

Does Estonia use oil shale for electricity?

Estonia joined the Nord Pool Spot market by 2012, securing its own price area within this regional electricity market. In 2018, oil shale constituted approximately 80% of Estonia's electricity consumption. By 2021, this figure had declined to 49%, reflecting a significant decrease in oil shale utilization for electricity generation.

The Estonian electricity system is part of the large synchronous operational united system BRELL, which comprises the AC power lines that connect Estonia with the neighboring countries of Latvia and Russia and their neighbors Lithuania and Belarus. Estonia is connected to Russia via three 330kV lines - two of these run from Narva to St ...
