

Why is energy important for Ethiopia?

Energy is one of the most significant sectors for Ethiopia's economic growth and development and is expected to increase significantly in the medium run. Ethiopia has abundant renewable energy resources and the potential to generate over 60,000 megawatts (MW) of electric power from hydroelectric, wind, solar, and geothermal sources.

Is Ethiopia pursuing a green energy revolution?

Ethiopia is pursuing a green energy revolution by developing its renewable energy sources, such as hydro, wind, solar and geothermal. However, the country faces some challenges and conflicts, especially over the Nile waters.

How much electricity can Ethiopia generate?

Lineman on a conductor bundle of the Ethiopia-Kenya 500 kV HVDC Interconnector (power line under construction) in Ethiopia. Ethiopia has abundant resources that can generate 60,000 TWh electricity from hydroelectric, wind, solar and geothermal sources in the next 10 years.

Does Ethiopia have a power shortage?

Ethiopia has the third largest energy access deficit in Sub-Saharan Africa with about half the population still without access to reliable electricity. Over the past decade, the Government of Ethiopia has made encouraging progress on its electrification program and expanded the grid network coverage to nearly 60% of towns and villages.

Is solar energy a good source of energy for Ethiopia?

Solar energy is another promising source for Ethiopia, as the country receives an average of 5.5 kilowatt-hours of solar radiation per square meter per day. The country has the potential to generate more than 5,000 MW of solar power and has already installed some solar plants and mini-grids in rural areas.

Is Ethiopia a green country?

Ethiopia is home to abundant renewable energy sources, including hydroelectric, wind, solar, and geothermal. With the potential to generate over 60,000 megawatts (MW) of electric power from these sources, the country is striving to become a regional leader in green energy.

Addis Ababa July 27/2022/ENA/ The Ethiopian Electric Power and Kenya Power & Lighting Company Plc have signed a power purchase agreement for the sale and purchase of 200 MW of energy in the first phase of the power export with ...
