

Exagrid backup storage Faroe Islands

Why should you choose ExaGrid tiered backup storage?

Our team is trained to ensure that your system is properly sized and supported to meet your growing data needs. With ExaGrid's Tiered Backup Storage, each appliance in the system brings with it not only disk, but also memory, bandwidth, and processing power--all the elements needed to maintain high backup performance.

Why is ExaGrid the leader in backup storage?

Learn why ExaGrid is the leader in backup storage. ExaGrid provides tiered backup storage with a unique disk-cache Landing Zone, long-term retention repository, and scale-out architecture. ExaGrid has the only non-network-facing tiered backup storage solution with delayed deletes and immutable deduplication objects.

Does ExaGrid support backup applications scale-out?

ExaGrid is integrated with backup applications scale-out functionality that allow backup applications to write to any ExaGrid appliance that is not still processing data allowing all appliances to be utilized for performance.

How fast is ExaGrid backup storage?

ExaGrid offers various-sized appliance models that can be mixed and matched with up to 32 appliances in a single scale-out system. The largest scale-out system can process data at a rate of 3X faster than any other backup storage on the market, with an ingest rate of 488TB/hr. ExaGrid is the expert in backup storage--it's all we do.

Where is backup data stored in ExaGrid?

Backup data is kept in the ExaGrid internal storage on an industry-standard logging filesystem where file activity is logged for integrity and quick repair after an unclean shutdown.

How many ExaGrid tiered backup storage models are there?

The ExaGrid Tiered Backup Storage product line consists of seven appliance models. Each appliance is sized for a full backup and for long-term retention. Any ExaGrid appliance can be mixed and matched in the same scale-out system with any other size or age appliance, allowing customers to buy what they need as they need it.
