

What is Finland's Energy Policy?

Finland's approach includes nuclear energy, more renewables for electricity and heat, improved energy efficiency, and economy-wide electrification. After Russia's 2022 invasion of Ukraine, Finland moved to cut Russian energy imports, which previously comprised 81% of crude oil, 75% of natural gas, and 19% of electricity imports in 2021.

Does Finland have a nuclear power plant?

As part of the energy transition Finland has been replacing electricity generation from fossil fuels with nuclear power and renewables. Wind power in particular has grown to be a significant part of electricity generation. A fifth nuclear reactor, Olkiluoto 3 was commissioned in 2023 and increased nuclear power generation by over 50%.

Why did Finland cut Russia's energy imports in 2022?

After Russia's 2022 invasion of Ukraine, Finland moved to cut Russian energy imports, which previously comprised 81% of crude oil, 75% of natural gas, and 19% of electricity imports in 2021. The country's energy shift is highlighted by launching Europe's first new nuclear reactor in 15 years in April 2023 and expanding onshore wind power.

How much energy does Finland use?

Pie chart. Total energy consumption in Finland was 1,281 PJ in 2020*. The top 3 of the total energy consumption Total energy were wood fuels 28%, fossil oil 21% and nuclear energy 19%. Infographic. 2020* The share of renewable energy in total consumption energy consumption was 40% in 2020*.

What is Finland's Energy and Climate Strategy?

Finland's energy and climate strategy targets carbon neutrality by 2035, emphasizing energy security, sustainability, and biodiversity.

Why is Finland a leader in biofuels?

The country's commitment to biofuels is one of the chief reasons it's ahead of many others. Finland gets 29% of all its energy needs from advanced biofuels. It also has extensive nuclear and hydro networks. But some of its bold targets for continued fuel-use improvement call for sustained government intervention.

In parallel, several American mining companies are also exploring similar resources, recognising the potential of natural hydrogen as a clean energy alternative. Bluejay Mining's Exploration in Finland. Bluejay Mining has embarked on a significant exploration campaign in the Outokumpu Belt, Finland, targeting natural hydrogen and helium deposits.
