

Who are fuel storage systems Ltd?

Fuel Storage Systems LTD are delighted to announce that we have been shortlisted as finalists for the prestigious APEA Awards (Association of Petroleum and Explosive Atmospheres) for the Best Non-Retail Fuel System installation of 2022. Our nomination was for our installation for Premier Marinas at the new Noss Marina

Can fuel cells be used in Antarctica?

Fuel cells are currently being used commercially in small-scale power plants and in vehicles. The use of fuel cells for large-scale power generation is not yet economically viable but it is hoped that this situation will change by the end of this decade, opening up opportunities for fuel cell usage in Antarctica.

What services does fuel storage systems offer?

Fuel Storage Systems LTD offer integrity testing for fuel storage tanks and pipework systems utilising calibrated precision ATEX approved testing equipment. We offer a wide variety of fill point cabinets keeping your installation compliant with the oil storage regulations. Manned or unmanned tank entry. Above or below ground storage tanks.

Can fossil fuels be used in Antarctica?

Fossil fuels are not practical as long term primary energy sources in Antarctica. Even if these resources could be considered inexhaustible, which obviously is not the case, there are many other detrimental effects associated with fuel usage in such a fragile environment, all of which encourage a reduction in fuel usage.

What is the main source of energy in Antarctica?

Fossil fuels are the predominant source of energy in Antarctica. Most Antarctic stations, including Scott Base, are powered by conventional generator units and diesel boilers.

Why should you choose fuel storage systems Ltd?

Whatever your fuel system installation and maintenance requirements, they will be well catered for when you make Fuel Storage Systems LTD your first choice of contractor.

Antarctic Fuel Re-Supply Operations Antarctica is a high-risk, high-cost environment and the success of any Antarctic programme depends upon a logistics system that delivers support ...

With over 25 years of experience, our staff have the expertise to provide our customers with tailored fuel solutions to match your energy storage needs at every capacity. At Premier Energy Storage we offer our clients high quality ...

The aim is to maximize renewable energy use through a combination of different supply and storage systems

Fuel storage systems ltd Antarctica

across all British stations in Antarctica to meet the target of net-zero carbon emissions by 2040.

The chemical characteristics of AdBlue require special storage and handling equipment. AdBlue storage systems can be manufactured from 1350 litres up to a capacity of 15000 litres, plus all our AdBlue tanks incorporate specialised AdBlue pumps suitable for aqueous solution, and are manufactured to fulfil the highest demands of quality, stability and longevity.

Fuel Storage Systems LTD offer a wide variety of services becoming a one stop shop for our engine test bed customers managing the whole process from start to finish. Fuel Reference has a wide range of applications on the testbed. These ...
