

Future and energy company Madagascar

Why should Madagascar invest in energy & telecommunications?

" Access to energy and telecommunications are top priorities for our government. This project is fully aligned with our vision for the development of Madagascar. It will allow a significant increase in our access to energy and digital services," said Andry Rajoelina, President of Madagascar.

Is Madagascar energy independent?

Secretary General, Ministry of Energy and Hydrocarbons of the Republic of Madagascar, Andriatongarivo Tojonirina Andrisoa, said: "The Government of Madagascar is committed to the energy transition and to setting up Madagascar to be energy independent, as stated in the President's Initiative pour l'Emergence de Madagascar (IEM).

How does the private sector provide energy and digital services in Madagascar?

With the exception of the national electricity company JIRAMA, energy and digital services in Madagascar are provided by the private sector. Low population densities and high poverty levels in most of the underserved areas make it impossible for the private sector to deliver these services on a purely commercial basis.

UNICEF Madagascar has been transitioning to solar energy since January 2023 in field offices, to tackle the challenges posed by climate change, particularly those affecting children, as highlighted in the 2021 Children's Climate Risk Index report, which stresses that children in Madagascar are among the most affected by the effects of climate change.

Madagascar is particularly subject to energy price shocks and consequent disruptions in energy supply. Like many isolated territories [10], this situation is mainly due to the heavy reliance in Madagascar on imported fossil fuels for electricity generation. To overcome this situation, since August 4, 2015, the Malagasy Government has introduced a new energy policy ...
