While your BESS can serve as a critical backup during power outages due to extreme weather or an unstable grid, battery energy storage systems are not a full replacement for an uninterruptible power supply. However, BESS can be used in conjunction with a UPS to help guarantee a facility will continue to function during power outages.

Your BESS stores excess energy to release when demand--and prices--are high. It's an intelligent, responsive system that balances sources like solar PV panels or generators to optimize your energy usage and lower costs.
