

Ghana renergy solutions

How has Ghana established its energy sector?

The results show that the Ghana Government has established its energy sector based on the definition of the key targets in line with the world trend. Ghana is equipped with a vast quantity of renewable energy potentials which include hydropower, solar, wind, and bioenergy.

How can Ghana reduce reliance on petroleum fuel?

Ghana has ability to lower the reliance on petroleum fuel through production of its own energy from sources that are renewable. If the right measures are properly taken, the potential renewable resources available in Ghana such as hydropower, solar, wind, biomass, biogas could reduce the current energy demand in Ghana by at least 55%.

Is solar energy a viable option in Ghana?

Ghana is a fertile ground for expanding renewable energy sector because of the abundance of the natural resources, geographical conditions and government policies which are favourable. The country is enjoying ample sunlight in the entire year and therefore solar energy is an option that is highly viable.

What are the challenges faced in the energy sector in Ghana?

Challenges faced in the energy sector in Ghana are the same as the other countries in sub-Saharan Africa. The demand for energy in sub-Saharan Africa countries has resulted from rising population.

What is the energy mix in Ghana?

The generation mix was dominated by 14 thermal plants that were installed, which accounts for almost 60% of the energy generation mix in Ghana. As at 2022, the shares of hydro and renewable plants were 39.9% and 0.3% respectively [26,27,28,29]. Energy mix in Ghana is relatively simple, though it has challenges.

What are the main sources of energy in Ghana?

Biomass or charcoal, crude oil (which include product of petroleum) and electricity are the major sources of energy that are heavily relied upon in Ghana to supply the total energy requirements for the population as well as the industry. Ghanaians traditionally rely on biomass, specifically wood fuel and charcoal.
