

SEOUL, December 2, 2020 -- Hyundai Motor Group has unveiled its new Electric-Global Modular Platform (E-GMP), a dedicated battery electric vehicle (BEV) platform. Revealed online today during an "E-GMP Digital Discovery" event, the platform will serve as the core technology for Hyundai Motor Group's next-generation BEV line-up. ...

GMP currently is seeking approval for a separate pilot project, called the "energy bundle innovation," that would pair solar panel installation with battery storage. GMP customers can either ...

Update: "100,000+ E-GMP EVs sold" and "Not the only dedicated EV platform" sections added. Hyundai Motor Group's long-awaited electric car platform, the Hyundai E-GMP, was revealed in 2021 and has ...

Executive Summary. During the period under review, The Gambia has experienced two significant developments. One of these is the ongoing, albeit uneven, consolidation of democratic gains resulting from the ...

But the E-GMP comes with one standardized battery module, which our engineers can flexibly put together to form a battery system that meets the particular range demands of any given model. All you need to do to make a longer-range BEV is to just put more modules in the system. This is a serious time and resource saver for vehicle development.

Existing BEVs only allow one-directional charging: the transfer of power from an external source to the vehicle battery. But the E-GMP comes with the hassle-free V2L (vehicle-to-load) function, which allows the passenger to charge external devices with the vehicle battery without an additional adapter. This function was made possible through ...

A BEV based on E-GMP is capable of a maximum range of over 500km with a fully charged battery, according to the Worldwide Harmonized Light-duty vehicle Procedure (WLTP). Moreover, it can high-speed charge up to 80 percent in just 18 minutes and can add up to 100km of driving range in just five minutes.

The GMP eCapstan-Battery Powered Fiber Puller (71490) is a first of its kind! It offers the quietest Capstan, where you can use it virtually anywhere. Capstan hoists, often called "catheads," make back-breaking work faster, easier, and more productive.

Hyundai Motor Group has unveiled its new Electric-Global Modular Platform (E-GMP), a dedicated battery electric vehicle (BEV) platform. Revealed online during an "E-GMP Digital Discovery" event, the platform will serve as the core technology for Hyundai Motor Group's next-generation BEV line-up.
