It is the sun's surface activity that creates magnetic particles in the sky and increases the visibility of the Northern Lights. In Greenland, the Northern Lights are visible relatively frequently, due to their geographic position. However, you should know that the visibility of the Northern Lights, in general, follows so-called solar flares.

If you're on the hunt for an awe-inspiring experience, then seeing Northern Lights from Greenland should be on your bucket list. With its otherworldly icy landscapes and eco-centric travel options, this is one trip that will stay with you for life. Greenland is an excellent destination to view the northern lights. It is ideally located

We had a few tours in the city, hunting the northern lights around the city. In some other countries, we literally go chasing clear skies, not necessarily aurora borealis. Here in Nuuk, we just drive around the city, looking for the best spots to compose a nice picture with the northern lights, or a darker placer to admire them even more.

In Greenland, you will be able to capture the Northern Lights in their full glory, whether it be in their traditional shades of green and yellow, to rarer colors of pink, blue, and violet. The Northern Lights, also known as the ...

A maior ilha do mundo guarda tantas histórias e uma beleza incrível ao mesmo tempo, mas nada em comparação com a majestade das luzes dançantes no céu. Embora pareça ter quase o tamanho do Brasil, a grandiosa Groenlândia ainda é desconhecida para muitos viajantes. Pode ser difícil acreditar que a maior ilha do mundo guarda tantas [...]

It turns out that Greenland has a near perfect combination of all of the elements necessary to see the Northern Lights. The town of Kangerlussuaq, population 499, has become popular in recent times due to a very stable climate that yields approx. 300 days a year of clear skies making the conditions perfect for experiencing this amazing phenomenon.
