

Guam power safe opzs

What is a powersafe OPzS battery?

PowerSafe OPzS batteries feature tubular plate technology that offers excellent cycling performance together with a proven long life under float voltage conditions. The pasted negative flat plate design provides the perfect balance for maximum performance across a wide capacity range.

What makes EnerSys powersafe OPzS a good battery?

Engineered with an optimized plate design, EnerSys PowerSafe OPzS batteries feature an increased capacity exceeding the DIN standard. Additionally, the die cast tubular plate design with low antimony offers excellent cycling capabilities and a proven long life under float conditions.

Why should you choose powersafe OPzV batteries?

These single cells benefit from an optimised plate design that gives capacities in excess of DIN standard values. In addition, PowerSafe OPzV batteries offer both an excellent float life and a high cycle life for a truly flexible solution. 6 OPzV 300 320

What are powersafe OPzS cells used for?

The specification of the PowerSafe OPzS cells make it ideal for a wide range of applications such as telecommunications, power generation and distribution, railway, airport and seaport signalling, computing, emergency lighting, automation and measuring systems.

Are powersafe OPzS batteries ISO 9001 certified?

Batteries must be installed in accordance with IEC 62485-2 and national/local regulations. The management systems governing the manufacture of PowerSafe OPzS products are ISO 9001, ISO 14001 and ISO 45001 certified 2022 EnerSys. All rights reserved. Trademarks and logos are the property of EnerSys and its affiliates unless otherwise noted.

Las baterías PowerSafe OPzS utilizan la tecnología de placas tubulares para ofrecer un excelente rendimiento en ciclos y una larga vida útil demostrada en condiciones de flotación. El diseño de sus placas negativas planas empastadas proporciona el equilibrio perfecto para alcanzar el rendimiento máximo en un amplio intervalo de capacidades.
