

Guam solar panels for my home

Does Guam have solar energy systems?

Until 2015, only a few off-grid photovoltaic systems (PV) and some distributed generation PV and small wind turbines were in use on Guam. Plans for several large solar farms have been announced. Guam has adopted a renewables policy that requires the reduction of fossil fuel consumption by 2020 to 20% less than the rate in 2010.

Does Guam have plans for a solar farm?

Guam has announced plans for several large solar farms. The island has adopted a renewables policy that requires the reduction of fossil fuel consumption by 2020 to 20% less than the rate in 2010. Another requirement is for 5% of electricity in 2015 to be from renewables, increasing to 25% by 2035. A net metering program began in 2009.

Why choose generation renewable - Guam?

I am extremely pleased with my solar system from Generation Renewable - Guam. I was paying more than \$400.00 for power to GPA before getting a solar system from Generation Renewable - Guam... I was never really able to save money on power until I got a solar energy system from Generation Renewable - Guam...

What should I do if my solar panels are not working?

Trim any trees around your solar system that may block the sun from reaching your solar panels. Check that there is no accumulation of leaves, debris, snow, or critters under the solar panels. In more arid climate, you may need to spray your solar panels with a garden hose to wash off built-up dust and dirt.

What is a solar inverter?

They are encased in ultra-high temp tempered glass capable of sustaining high wind loads (175 mph) and performing efficiently even in low light conditions and are backed by a 25-year warranty for minimum power output. GoSolar uses high efficiency low cost \$/watt micro-inverters by NEP(TM).

Do I need to spray my solar panels with a garden hose?

In more arid climate, you may need to spray your solar panels with a garden hose to wash off built-up dust and dirt. You can do this while standing on the ground - we strongly advise against you climbing on your roof for any reason.

The amount of energy generated in your home. The national American average is estimated at 920 kWh or Kilowatts per hour. What % of your power you want the solar panel to use. It is possible to purchase a system that accounts for just 10% of your system or you could install a system designed to completely rule your energy output.

Understanding Solar Leases. The US Department of Energy's Better Building Initiative defines a solar lease as

Guam solar panels for my home

"a type of lease specific to solar energy systems where the lessor owns the solar equipment and the customer rents it at a fixed monthly rate.". In other words, after you sign, the solar leasing company will still own the panels installed on your roof ...

Eliminate or Lower Energy Costs. With a solar system, you can generate free power over a 25-30 year life cycle. Even if you do not produce all of the energy you consume, your utility bills will be much smaller and save you lots of money.
