

Guinea new power solutions

Is Guinea a potential exporter of power?

Guinea's hydropower potential is estimated at over 6,000MW, making it a potential exporter of power to neighboring countries. The largest energy sector investment in Guinea is the 450MW Souapiti dam project (valued at USD 2.1 billion), begun in late 2015 with Chinese investment.

What will Guinea's energy mix look like by 2025?

Guinea's energy mix by 2025 will be dominated by hydropower, which would account for over 80 percent of the total installed capacity, should these planned investments be realized. Solar power is also growing in popularity for both corporate and residential use.

How has Kaleta changed Guinea's electricity supply?

Kaleta more than doubled Guinea's electricity supply, and for the first time furnished Conakry with more reliable, albeit seasonal, electricity (May-November). Souapiti began producing electricity in 2021. A third hydroelectric dam on the same river, dubbed Amaria, began construction in January 2019 and is expected to be operational in 2024.

The Government of Papua New Guinea has set a target of connecting 70% of Papua New Guinea's population to renewable electricity by 2030. By 2050, the Government hopes to have reached universal electricity access throughout the country. UNDP hopes to contribute to this aim through its various initiatives in the country.
