

Guyana energie power limited

What is Guyana Power & Light Inc?

Guyana Power & Light Inc. (GPL) is a company that generates, transmits, and distributes electricity to customers in most areas along the coastal plain of Guyana. Our customer base includes regions from Charity in Region 2 up to Moleson Creek in Region 6.

Who owns the electricity industry in Guyana?

The electricity industry is operated by the state-owned electricity company, Guyana Light and Power Inc. (GPL), with an installed operating capacity of 337 MW in 2020.

What type of electricity is used in Guyana?

The electricity sector in Guyana is dominated by Guyana Power and Light (GPL), the state-owned vertically integrated utility. Although most of Guyana's electricity comes from thermoelectric diesel-engine driven generators (226 MW of installed capacity), the country has a large potential for hydroelectric and bagasse-fueled power generation.

How Guyana Power & Light Inc (GPL) electrical energy is produced?

Guyana Power & Light Inc., (GPL) produces, distributes, and transmits electrical energy. At the generating source of GPL, the electrical energy is produced in a three phase four wire star configuration.

Where did electricity come from in Guyana?

Electricity generation in Guyana began before the turn of the twentieth century with several individual entities, private/community enterprises providing their own power. Georgetown, a relatively small enclave, received power from a private supplier.

How much power does Guyana generate?

Guyana had an installed power generation capacity of 226 MW in 2007, which is 0.4 kW per capita. This is lower than in other countries in the region and is hardly sufficient to cover the current demand for electricity in the country. Most electricity generation in Guyana uses Diesel engines to drive generators.

Guyana's Finance Minister, Dr. Ashni Singh, announced the anticipated commencement of the construction of the Gas-to-Energy (GtE) integrated facility, which includes a 300-megawatt (MW) power plant, in the second quarter of 2024. The government contracted a US-based group (CH4-Lindsayca) to build out the facility at Wales for US\$759 million.
