Guyana"s drive against Climate Change led to the establishment of the Guyana Energy Agency (GEA), which encourages the use of clean and renewable energy. Dr Mahender Sharma, the GEA"s Director, has highlighted several achievements: 30,000 solar panels were installed in riverine and hinterland homes, each unit equipped with 2 nine-watt LED ...

This programme will help the nation migrate, in about three years, to a grid that uses 19 per cent renewable energy. Through funding renewable energy initiatives, Guyana is working with several partners, ...

The 2016-2019 Energy Regulatory Office auction results created approximately 3.4 GW of new wind energy capacity and is an important mechanism to fulfill Poland's renewable energy targets. To meet Poland's 2020 and 2030 RES obligations, the Polish government plans extensive development of its offshore wind farms.

In recent years, Guyana has made significant strides in the pursuit of sustainable development with renewable energy projects. As the world grapples with the existential threat of climate change, Guyana's commitment to a long-term strategy to harness natural resources for clean energy is timely. One of the most notable projects is the Gas-to ...

GUYANA has an abundance of natural resource capacity which positions the country to tap into more renewable sources of energy, like from water or the sun, to meet its growing electricity demand. The demand for electricity in Guyana is expected to triple by 2026 as the country develops its productive sectors such as manufacturing.

However, while Guyana's energy demand, driven by population growth and economic development, is projected to increase, it is anticipated that as the country transitions to nearly 100 per cent of renewable energy by 2040 in keeping with its Green State Development Strategy: Vision2040 (GSDS: Vision2040), fewer financial resources would be ...

In the Nationally Determined Contributions, Guyana has committed to develop a mix of wind, s olar, biomass and hydro-power to supply both demand of the national grid and the energy requirements for towns and villages in Guyana s hinterland. Guyana has set an ambitious target of achieving close to 100% renewable energy in the power sector by 2025.
