

What kind of energy does Haiti use?

This page is part of Global Energy Monitor 's Latin America Energy Portal. Haiti relies on a mix of imported oil and domestic biofuelssuch as wood and sugar cane for its total energy supply. As of 2020,more than 90% of electrical generation in Haiti was derived from fossil fuels and less than 10% from renewables.

Will USAID and NREL reshape Haiti's energy landscape?

In a bid to reshape Haiti's energy landscape, USAID and NREL will support Haiti's ministries and government in formulating the country's Integrated Resource and Resilience plan, which is a comprehensive energy sector master plan that envisions a sustainable, secure, and resilient energy future for Haiti.

How can Haiti improve energy resilience?

In the face of these obstacles, Haiti is forging a path toward energy resilience with support from USAID and the National Renewable Energy Laboratory (NREL). Central to this effort is the development of energy modeling frameworks and trainings, microgrids, agrivoltaics, and off-grid solar power to enhance energy resilience and security in Haiti.

How does oil affect electricity in Haiti?

Like many island nations,Haiti is highly dependent on imported fossil fuels for electric generation--roughly 85% of its electricity is produced from the combustion of petroleum-based fuels. This leaves the country vulnerable to global oil price fluctuations,which directly impact the cost of electricity.

Why is electricity so expensive in Haiti?

This leaves the country vulnerable to global oil price fluctuations,which directly impact the cost of electricity. Haiti also faces challenges in terms of lack of grid access,reliability of electricity service,and the prevalence of wood and charcoal fuels for home energy consumption.

How can agrivoltaic solutions improve energy production in Haiti?

Through research and stakeholder engagement, USAID and NREL published a framework to adapt agrivoltaic solutions for minigrd contexts in Haiti. These solutions aim to boost energy production, thereby addressing energy poverty, and increase agricultural yields, thereby addressing food insecurity.
