PVSell uses 365 days of weather data. Please read the paragraphs below and remember that the table is a guide and a starting point only - we encourage you to do more ...

Solar is a great way to help you take control of your energy costs -- but it won't protect you from a blackout. Pairing solar with battery storage means solar power even when the sun is down, or the grid is out.* And if your utility charges time-based rates, a solar powered battery could help maximize your savings.
