

To fully support the Country's "3060 Dual Carbon Targets" and the HKSAR Government's "Hong Kong's Climate Action Plan 2050" carbon reduction strategy, China State Construction Engineering (Hong Kong) Limited (hereafter referred to as "CSHK" and the "company") today hosted the "CSHK Clean Energy Plan Activation cum Memorandum of ...

Part three of a three part series that details the Energy Policy Simulator (EPS). In this video, our team walks through each of the remaining key sectors and calculation in the of the EPS, including the input-output model and associated cash flows, land use, carbon capture, endogenous learning, district heating and hydrogen supply, and health impacts, and discusses the input ...

Hong Kong seeks to achieve a low carbon future by investing in renewable energy solutions. With almost all its energy demand met by imported supply, primarily from Mainland China, developing Hong Kong's indigenous renewable energy from offshore wind offers the potential to meet the city's low carbon ambition and, at the same time, pursue energy ...

CLP e has built an experienced team of more than 600 professionals to empower Hong Kong and Mainland China towards their Net Zero Carbon objectives by respectively 2050 and 2060. As a trusted partner to provide Energy and Infrastructure Solutions in ...

"Hong Kong 2050 is Now" seeks to mobilize action to transition Hong Kong towards long term carbon neutrality, and set an example for how the city can mitigate the risks of climate change. An initiative of Civic Exchange, World Resources Institute, ADM Capital Foundation and RS Group, we serve as a platform for research and collective action.

Although topographical reasons make it unlikely that Hong Kong will be able to become completely self-sufficient in clean energy in the near future, a strong expansion of locally produced renewable energy is an important element in decarbonising the power sector, which is responsible for 70% of Hong Kong's greenhouse gas emissions and today ...
