Panama targets 1.7 GW of distributed renewables by 2030. Over 30 electricity generation companies are operating in the country, along with three distribution companies. The country imports all its oil products. In 2022, renewables represented 77% of the power mix (67% hydro). Gasoline and diesel prices decreased slightly in 2023 after a jump in ...

(82 MWh) of battery storage, increasing the renewable energy share from 58% to 69%. 2 In the case of Panama, the expansion includes solar PV and wind capacity and battery storage. Domestic transmission capacity expansion is not relevant in this case given that it is a single-node model. The investment costs of installing additional
