Will Namibia become a supplier of energy?

Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Does Namibia need a power trading system?

The required infrastructure for power trading already exists. About 40% of Namibia's power currently comes from South Africa and is primarily driven by coal-fired power plants. We imagine a reality where Namibia exports clean energy to South Africa thereby assisting the Southern African region to decarbonize.

Does Namibia have a vision of shared prosperity?

As Namibia embarks on this new frontier, it is imperative that its vision of shared prosperity on the national, regional and global levels is realized. Meaning that we do not neglect those without access to political and economic power today nor exclude those who currently rely on carbon fuels.
