

Will Hungarian energy storage projects get subsidy support?

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a tender launched in February this year.

How much does Hungarian government spend on energy storage projects?

The Hungarian government has allocated HUF 62 billion (EUR 158 million) for energy storage projects with an overall 440 MW in operating power. Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. The winning bidders were selected a few days ago.

Will Hungary provide grants for energy storage projects in 2025?

The Ministry of Energy in Hungary will provide grants for the deployment of energy storage projects, with some 1GWh targeted by 2025. From June, system operators and distribution companies will be able to apply for subsidies to build energy storage facilities by the summer of 2025 at the latest, the Ministry said.

What is a Bess project?

Based on Government Decree 382/2023 (VIII 14) of Hungary, the approach to electricity production and consumption from renewable energy sources has taken a new turn: BESS projects are now among those investments the government intends to support with financial incentives.

Does Hungary have a new approach to renewable storage?

The Government of Hungary has recently passed legislation regarding Hungary's approach to renewable storage, introducing significant changes aimed at creating a more favorable environment for energy storage providers.

What does Bess stand for?

A recent legislative act in Hungary laid down the principles for the eagerly awaited battery energy storage systems (BESS) support scheme. The incentives follow well-known patterns similar to those already available for solar projects.

The BESS will shift the renewable generation to the evening hours and trade energy on the market, and the trading and optimisation service will be provided by utility KER Toki Power. ... Austria-headquartered Renalfa ...

To avoid major setbacks to the timeline and budget of a BESS project, it is important to recognise and plan for potential procurement risks. Prior to executing a battery procurement contract, developers and integrators must identify, assess and implement plans to minimise risks inherent in today's procurement environment. Markets & future ...
