

What is Hungary's largest solar energy project?

Hungary's largest solar energy project is underway, in collaboration with Huawei. The contract was signed in February, with MAVIR Ltd. as the investor.

How much solar power will Hungary have by 2030?

According to the timetable set by the new National Energy Strategy adopted in January, at least 6,000 MW of solar capacity must be operating in Hungary by 2030, which can only be accomplished if large-scale project development starts in the country as soon as possible. Are you considering entering other markets?

Who is SolServices Ltd?

SolServices Ltd. consists of a dedicated project development team, specialized in the development of solar parks with large installed capacities.

What is Hungary's energy storage capacity?

Currently, Hungary's entire energy storage capacity stands at 30 MW. The new storage battery is set to be operational by 2025, making it easier and more cost-effective to store renewable energy. This development is expected to enable the green energy sector to make a greater contribution to Hungary's energy mix.

How many MW does Hungarian electricity have?

Meanwhile, it is also apparent that more than 10,000 MW of installed capacity operated in the Hungarian electricity system around 2010, which decreased to 8,900 MW by the end of 2019.

What is the rate of growth in electricity consumption in Hungary?

The rate of growth in electricity consumption in Hungary is accurately indicated by the data of MAVIR Zrt. (MAVIR Hungarian Independent Transmission Operator Company Ltd.), according to which domestic electricity consumption increased by 2.6 percent in the first quarter, even before the pandemic, compared to the same period of the previous year.
