

HDF Energy is a global pioneer in hydrogen energy. HDF Energy develops high-capacity Hydrogen-Power plants and is active, through dedicated project companies, in their operation. These plants will provide continuous or on-demand electricity from renewable energy sources (wind or solar), combined with high power fuel cells supplied by HDF Energy.

Sep 10, 2012 - Energy Infrastructure Global Inc said on Monday it will implement 3 MW of solar power and 750 kW of hydropower as part of the upgrade of the power grid of the Island of Pohnpei, Micronesia. The renewable energy infrastructure firm said it had inked a memorandum of understanding with Pohnpei Utilities Corp on the project, which ...

Renewstable &#174; plants produce entirely non-intermittent, renewable and dispatchable electricity 24/7. They combine an intermittent renewable source and mass, long-term storage of energy through a hydrogen chain, the green alternative to a classic diesel fuel power plant as they only use solar energy and water to produce stable electricity thus ...

2 ???&#0183; US-based investor Acadia Infrastructure Capital, alongside companies such as Microsoft, is spearheading a \$9bn initiative to develop renewable energy projects across the US, as reported by Reuters.. The Climate and Communities Investment Coalition (CCIC), launched with Microsoft as an anchor member, aims to accelerate corporate-led renewable energy ...

This profile provides a snapshot of the energy landscape of the Federated States of Micronesia (FSM), a sovereign nation and U.S.-associated state in the western Pacific Ocean. The FSM is made up of more than 600 islands, which presents a significant challenge of delivering electricity to people living on outer islands.

The Renewable Energy and Energy Efficiency in the Federated States of Micronesia project contributes to the FSM's Energy Master Plan focused on rapidly boosting access to energy for ...

Recognizing the urgent need for a shift towards clean energy, the governments of Micronesia have taken significant steps to develop and implement renewable energy policies and projects. In recent years, several Micronesian countries have set ambitious renewable energy targets, aiming to achieve 100% renewable energy generation by 2025.

In addition, PTSC and HDF Energy are aiming to extend this collaborative business model to the Asia Pacific region. The MoU reinforces the two companies' sustainable business strategies toward renewable energy and reaffirms our commitments and support for the decarbonization and net-zero targets of each government of Vietnam and France.

HDF Energy also develops green or low-carbon hydrogen production infrastructure projects tailored for industrial applications. This infrastructure harnesses the power of electrolysis, a process that extracts hydrogen from water, coupled with green and low-carbon electricity generated by renewable and energy-efficient power sources.
