

Hytech power Bolivia

The Hytech Main Drilling Power System is a closed loop hydraulic power system (HPU). The flow and pressure control on the main pumps is very quick and accurate, which allows efficient and precise operation of the equipment. An extensive monitoring system ensures safety and gives the operator an overview of the system status.

The rated power can reach 100kW. The control system independently developed by Hytech Power Inc adopts V-model development process, visual model development mode and automatic code generation technology, which can greatly reduce the power consumption The modular development ensures the reliability of system development.

Our Services At Hytech Power, we strive to drive the future of sustainable engineering by enabling our clients to achieve maximum efficiency and performance with their systems and processes Our Featured Services We Provide a Range of Services to Our Clients Engineering & Analytics o Automotive engineering o Mechanical engineering o CANbus Engineering o Engine
