

Who is IBS intelligent battery system?

IBS Intelligent Battery System GmbH develops, manufactures and distributes electronic systems and modules for the 12V and 24V battery market. 15 years of experience in battery technology and microelectronics have led to a wide range of versatile products.

How does the IBS Global Monitor a car battery?

The IBS Global measures the condition of the battery and provides information on the state of charge (SOC), ageing (SOH) and starting capability (SOF). The sensor can be easily integrated into the vehicle electrical system where it monitors battery voltage, power and temperature 12 V vehicle electrical system environments.

What is an IBS 12 volt sensor?

The IBS 12 volt sensor delivers the input for the central energy management in the vehicle. This data can be transferred directly to the cloud. If the IBS is integrated into the vehicle's telematics system, the battery condition, for example for the entire delivery fleet, can be monitored as with DeliveryBots.

What is the IBS global?

The IBS Global is designed for use in starter, gel and AGM batteries to monitor starter or consumer batteries in the vehicle. Using the standardised LIN protocol, the sensor can be directly integrated into the vehicle electrical system, e.g. CI BUS.

What is an intelligent battery sensor?

Intelligent battery sensors (IBS) for 12-volt lead-acid batteries ensure optimum energy management in cars and vans (both with internal combustion engines and electric motors), agricultural machinery, last-mile vehicles, motorhomes, small construction machines, quad bikes, diesel forklifts and marine applications.

Where is IBS-DBS made?

We manufacture exclusively in Switzerland to maintain high quality products. In a comparative test of double battery systems in the USA, IBS-DBS received the award: Best Buy Award. We have further developed the inverter family and DBM20A and DBM20AS.

Nach einigen Jahren wird das Doppel Batterie System IBS-DBS nun vom Nachfolgemodell IBS-DBS/12V-EM und IBS-DBS/24V-EM abgelöst. Neu ist das System mit Doppelspeisetechnologie ausgerüstet (eine Batterie kann ausgewechselt werden und das System läuft ab der anderen Batterie weiter), Ladealarm wenn die Ladung über längere Zeit über 15V liegt.

Die Doppelbatteriesysteme IBS-DBS und DBi-DBS sind vom Konzept her identisch, verfügbar neu auch in 24V Ausführung. Sie eignen sich hervorragend zum Einsatz in Reise-Geländewagen, Servicefahrzeugen, Polizeifahrzeugen, ...

Iceland ibs intelligent battery system

IBS Intelligent Battery System GmbH develops, manufactures and distributes electronic systems and modules for the 12V and 24V battery market. 15 years of experience in battery technology and microelectronics have led to a wide range of versatile products. All our 4WDs for Sahara and Outback tours are fully IBS equipped and often have to ...

Ibs is a intelligent battery sensor, it mainly detects if you have a current draw when the car is turned of and helps locate the fault. ... a different battery size since the car just defaults to normal charging mode where the alternator provides 14V to the system while running to keep the battery charged. You also lose out on the benefits of ...

Faltbare Solarzelle SK110+ ...

IBS Intelligent Battery System GmbH is a young, active electronics company engaged in the development and production of advanced electronic devices and systems for portable power for recreation, travel and professional use. The components are: Battery systems: dual battery systems for 4WD, commercial vehicles, ambulances, police and military

TLD's intelligent Battery Systems (iBS) is a modular battery design. It consists of individual 80 VDC packs that can be combined like building blocks, to create batteries with a 22 kWh increment (e.g. 44, 66, 88 kWh or higher). The iBS can be used on all TLD GSE electric product lines. Size and dimensions of the packs were carefully defined ...
