

India affordable power solutions

Why is India adopting a multi-fuel approach?

Despite fast-tracking its energy transition, geopolitics and extreme weather are leading many countries to look inwards, and India is no exception. To ensure its energy security and also to meet its objective of energy access and providing its people affordable power, India is adopting a multi-fuel approach.

Which is the fastest growing solar energy company in India?

Power intensive industries need low cost and reliable alternate sources of energy. Ilios Power is one of India's fastest growing Solar Energy Companies in India founded by IIT alumni. With 55MW+EPC, 95MW O&M, Ilios has setup residential rooftops to large scale MW plants.

Is rooftop solar a viable option in India?

While several states in India have subsidies for household solar adoption, accessing this capital has been difficult, hampering widespread adoption of clean energy. Moreover, awareness of the cost-saving potential offered by adoption of rooftop solar is still limited.

Will India achieve low-carbon energy security?

India's total primary energy demand is expected to increase by 63% by 2030, while its contribution to global energy-related CO₂ emissions is expected to grow from 6.7% in 2017 to 10.6% (International Energy Agency 2021); thus, achieving low-carbon energy security is critical for the country's sustainability journey.

Is nuclear energy a good source of energy in India?

Nuclear energy can be another thrust source for cleaner energy. Currently, nuclear energy contributes a total of 3.11% of the total energy generation in India. Atomic energy can be crucial for energy efficiency, given its smaller land footprints and waste.

What does India's energy policy look like in 2040?

India's global climate pledge to source 40% of its energy from renewable sources by 2040 reveals its policy objective of stiff focus on promoting renewable energy (Ministry of Environment, Forest and Climate Change 2015). India's energy mix trends further reflect shifting governmental emphasis on clean energy production.
