

What does Redbridge Energy DMCC do?

REDBRIDGE Energy DMCC's main activities are trading refined oil products and crude oil, plastic and nylon materials, chemical fertilizers, and petrochemicals. ION solutions for crude oil, NGLs, refined products, biofuels, and petrochemicals address the entire energy value chain, from upstream through midstream and downstream to consumption.

How is India advancing Advanced Energy Solutions?

As the world watches, India is progressing advanced energy solutions rapidly. India is setting ambitious targets for deploying advanced energy solutions such as clean hydrogen, energy storage and carbon capture. By 2030, it plans to invest over \$35 billion annually in these areas.

What is India's energy security strategy?

India's energy security strategy is increasingly focused on alternative fuels, with natural gas as a substitute for petrol, and ethanol playing a pivotal role in blending. The rising use of ethanol has supported a reduction in fossil-based gasoline reliance, leading to lower crude oil imports.

How has India achieved its energy transition goals?

India has set bold ambitions and demonstrated remarkable progress on energy transition investment. For example, it surpassed its 2030 goal of achieving 40% of installed capacity from renewable energy sources nine years in advance.

What will India's energy future look like?

According to Jennifer Granholm, US Secretary of Energy, "In so many ways, the world's energy future will depend on India's energy future." In line with this, the country is adopting ambitious goals for deploying solutions such as clean hydrogen, energy storage, carbon capture and sustainable aviation fuels.

How will India grow further in the lng space?

The government's agenda is to raise the share of gas in the energy mix from 6% to 15%. Within that, there are two spaces where we want to grow further. One is in the LNG space for heavy-duty vehicle transport. The heavy vehicles segment accounts for significant emissions in India.

India's energy security strategy is increasingly focused on alternative fuels, with natural gas as a substitute for petrol, and ethanol playing a pivotal role in blending. The rising ...
