

JAKARTA, Aug 7 (Reuters) - Four foreign renewable energy companies said on Monday they will jointly explore opportunities to produce solar panel components and energy storage systems in Indonesia.

Solar panel manufacture in Indonesia appears primed to thrive with the increase in solar power projects. In addition to serving IPPs developing new on-grid systems to replace diesel power generation facilities, the many off-grid and PV Stand Alone system projects undertaken by PLN in remote, outlying islands presents another area of opportunity.

A future economic and solar giant. In mid-century, Indonesia is expected to be the sixth most populous country in the world with 320 million people. It is expected to be a top four global economy by gross domestic product (after China, India and the United States), up from 16 th spot today. What happens in Indonesian energy markets matters at a global level in terms ...
