

Are solar panels a good option in France?

More and more companies are either selling, or installing, solar panels for people across France. This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative to gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France.

How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: Why record numbers of homeowners in France are installing solar panels

How much does a DIY solar panel cost in France?

The average price for a DIY kit including 16 panels is around EUR6,250. These are generally capable of producing 64,000Wc (watt crête, or 6.4 kWc), which is about 1.5x the power consumption of an average household in France.

Who makes curved thin-film solar panels?

Curved thin-film panels made by Heliatek, a German solar company, cover a wind turbine in Spain. HELIATEK A version of this story appeared in Science, Vol 378, Issue 6620.
