

Why is energy important in Iraq?

Energy in Iraq plays a crucial role in both the national economy and the global energy markets due to the country's vast oil reserves and significant status within the Organization of the Petroleum Exporting Countries (OPEC). Iraq holds abundant oil and gas resources and has strong solar PV potential.

Is Iraq a good country for solar energy?

Iraq holds abundant oil and gas resources and has strong solar PV potential. Its production to 2030 is set to be the third largest contributor to global oil supply. By the same year, the government expects that renewable capacity will amount for 5% of the country's total system capacity.

How much natural gas did Iraq produce in 2022?

Iraq consumed significantly more natural gas than it produced in 2021, primarily for electric power generation. The country also flared over 630 billion cubic feet (Bcf) of natural gas in 2022 due to inadequate pipeline and processing infrastructure, making it the second-largest flaring country globally.

How much money does Iraq need to rebuild its energy sector?

The economic constraints brought on by lower oil prices and revenues further dent Iraq's ability to invest in the rehabilitation of its energy sector, which will require between US\$5bn and US\$7bn per year over the next decade.

Does Iraq's capital budget affect its long-term oil and Gas Development Goals?

The average annual capital budget allocated to the Ministry of Oil was one-fifth lower in the 2015-18 period than in 2013, affecting Iraq's ability to pursue its long-term oil and gas development targets.

Why is Iraq facing a major energy crisis?

Already in a fragile state, Iraq's economy is today facing a major crisis resulting from the impact of the Covid-19 pandemic on global oil markets, underscoring the urgent need for reforms of the country's energy sector.

The Turkish Petroleum Company (later renamed the Iraq Petroleum Company) held a monopoly over Iraq's oil fields for the better part of 30 years -- all the way up to the formation of OPEC. Of course, the Turkish Petroleum Company inked its first exploration concession back in 1925, then struck pay dirt two years later with the kind of gushers ...
