

Ireland zenaji battery

What type of batteries will you get at zenaji?

The type of batteries you will get at Zenaji consists of a unique battery management system. The system provides the ultimate battery protection and optimises the performance of your battery. We ensure all our battery systems offer a long-term solution to all your energy storage needs.

Who makes zenaji batteries?

Zenaji, founded in 2016, is an Australian-owned company with a specialisation in the development and production of Lithium Titanate (LTO) batteries. Their flagship product, the AEON battery solution, is manufactured and assembled at their plant in Mentone, Victoria.

What is a zenaji Aeon battery?

The Zenaji Aeon Battery is designed for use in domestic, commercial and stand-alone energy storage installations. If you need a battery that uses 100% of its installed capacity, then we highly recommend choosing an Aeon Battery. Such batteries have a continuous power of 1.25C and a longer service life of around 50+ years.

How long can a zenaji battery last?

Zenaji's market leading battery longevity makes it capable of delivering over 22,000 cycles (within warranty). With low degradation and high resistance to higher temperature ranges, our battery energy storage system offers everything you expect from a reliable energy storage source.

What is a zenaji Aeon (lithium titanate) battery?

Zenaji Aeon (Lithium Titanate) battery, 20,000 cycles, 20 year warranty, made in Australia, the most durable in the world.

Why should you choose zenaji batteries for your energy storage system?

The flexible design of energy storage systems can accommodate both small-scale and large-scale applications. Zenaji supplies an extensive range of Australian made batteries that use 100% of installed capacity. The batteries can meet your energy demands in case there is any emergency or a sudden spike in overall energy consumption.

Mark Woods Zenaji Aeon Battery Testimonial 2020. We had been considering a home solar system for quite some time, but our site had its challenges. We had shading issues, frequent patchy cloud resulting in sun bursts. Used most of our power at night, required two phase support and whole house backup. Instead of waiting for the right products to ...
