Look no further than the 10000 Watt Solar Generator by ZESE Li-ion Recycling Tech Co., Ltd. This innovative and powerful generator harnesses the sun's energy to provide clean and efficient electricity wherever you go, Equipped with high-quality solar panels and advanced lithium-ion battery technology, the 10000 Watt Solar Generator delivers ...

The generator has a very high wattage meaning it can hold loads of up to 10000 watts. The installed battery bank capacity is very proportional to the size of the system. The type of battery used is also one of the best in the solar industry. This system simplifies the sophisticated and high capacity solar systems into one single generator.

10,000 watts is a crapton of power, since you have gas heat, unless you positively need AC even during emergencies and you have a very large AC system you don't need 10,000 watts. If you have a wattage meter in your panel you can see how much you use. I suspect the 2,200 watt one you were originally thinking is a lot closer to what you need.
