

What is Jamaica's energy source?

This page is part of Global Energy Monitor's Latin America Energy Portal. Oil and natural gas continue to supply most of Jamaica's energy, supplemented by significantly smaller contributions from renewables. As of 2020, nearly 89% of electricity was still generated by fossil fuels.

What is the cost of electricity in Jamaica?

Jamaica's electricity cost is approximately \$0.39 per kilowatt-hour (kWh). This information is provided in the energy snapshot of Jamaica, an island nation located in the north Caribbean Sea. The utility rates are above the Caribbean regional average of \$0.33/kWh.

Who regulates electricity in Jamaica?

MSET (Ministry of Science, Energy, and Technology) is the government institution responsible for energy. NEPA (National Environment and Planning Agency) is responsible for permitting and tracking all environmental impact assessments. OUR (Office of Utility Regulators) is responsible for regulating Jamaica's electrical sector.

Is Jamaica following the National Energy Policy 2009-2030?

Jamaica is currently following the National Energy Policy 2009-2030. Jamaica's December 2020 update to its NDC (Nationally Determined Contribution) aims to reduce greenhouse gas emissions by more than 25% relative to business as usual levels by 2030, with the majority of reductions coming from the energy sector.

Is biomass a source of electricity in Jamaica?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Jamaica: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
