

# Jersey solar panel installment

How do solar panels work in New Jersey?

In New Jersey, solar panels are installed on warehouse rooftops and other community projects. The solar power generated is delivered into the local power grid, and you receive dollar credits on your utility bill as if you had generated the electricity yourself. **HOW IT WORKS:** Solar Panels are located at community projects across New Jersey and send electricity into the utility grid.

How much does a solar panel cost in New Jersey?

The average cost of a solar panel installation in New Jersey ranges from \$12,792 to \$17,308, or an average of \$2.56 to \$3.46 per watt (\$/W).

Why is solar important in Jersey?

Solar is a vital component of modern homes in Jersey, contributing to the state's renewable energy and energy management. For those focused on the bottom line, solar serves as a safeguard against rising grid electricity costs.

Why should you choose SunWorks Solar panels?

SunWorks Solar panels are a great choice for several reasons. As utility energy prices rise, the savings from using SunWorks Solar panels become even more significant. They offer a select range of specialist solar products suitable for almost any roof type. Their solar panels come from reputable brands with robust warranties that extend up to 25 years.
