

What is Jordan's Energy Strategy?

In parallel, Jordan's Ministry of Energy and Mineral Resources developed the "Executive Action Plan for the Comprehensive Strategy of Energy Sector in Jordan for the period 2020-2030", which identifies a set of Jordanian characteristics and roles in the regional energy scene.

Why should Jordan invest in the energy sector?

Jordan will also increase its investment mix from countries of the region and the world into the country's energy sector in order to foster closer economic ties in a context that enhances Jordan's position as an economic hub that is free from political influence.

What type of energy is used in Jordan?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Jordan: How much of the country's energy comes from nuclear power?

What is the Executive Action Plan for the energy sector in Jordan?

The Executive Action Plan for the Comprehensive Strategy of Energy Sector in Jordan for the period 2020-2030 outlines the country's direction in the energy sector, as well as its involvement in regional energy projects by using geographical considerations and logistics to play a major role in the region.

What happened to Jordan's electricity?

The exchange of electricity with Egypt continued, which led to stability of Jordan's electricity, agreements were concluded to raise the export capacity of the Jericho region, negotiations on contracts to supply Iraq with electricity were made and memos were signed to connect Jordan and Egypt electrically with the GCC countries.

How is Jordan positioned to participate in the regional energy scene?

Given the figures of the generating capacity and the local consumption of electricity, Jordan is positioned to participate in the regional energy scene by exporting electricity to neighboring countries in the first place and at present in particular.

High solar and wind potential position Jordan as an attractive country for producing PtX. Closely located to ports and Europe, Jordan is well placed to become a PtX producer and exporter. In 2020, the Jordanian Ministry of Energy and Mineral Resources (MEMR) released the 2020-2030 Energy Strategy.
